

SMART FRAUD PROTECTION

In an ever-changing world where voice and data operate on the same network and PBX's are IP-based, the threat of fraud is greater than ever. **Smart Choice** keeps your business voice and data networks secure in an unsecure world. With our **Smart Fraud Protection** safeguards, we defend you from threats of potential fraud and monitor your network to ensure your information is safe. Smart Choice continues to adapt and innovate to ensure that our customers receive the utmost protection and support.

SAFEGUARDS

Account Codes

Require specific passcodes to grant access to networks and other information.

Call Restriction

Allow or restrict calls by country code/time of day routing.

24/7/365 Monitoring

Our dedicated staff monitors calls 24/7/365 to analyze trends and detect any signs of breaching or fraud.

Dialing Restrictions

Restrict certain users from dialing domestically or internationally.

Smart Calculation

Automatically determine if a customer is dialing more internationally/domestically than usual and shut down traffic if needed.

Smart Tally

Limit clients to a certain dollar amount of usage from periods as short as 30 minutes up to 1 month.
