

# WiFi SOLUTIONS FOR EVENTS

When hosting an event, it is very likely you'll come across a question regarding WiFi connectivity. In today's world, Internet access and social media can play a major role in the success of your event, and will surely affect the outcome of your attendance, media coverage and even your revenue stream. Whether your guests are looking to share their experience on social channels such as Twitter and Instagram, or need to check their important business emails, you need to ensure your attendees have the right tools to stay connected.

Fortunately, **Smart Choice** has temporary wireless solutions for the occasions where convenient Internet accessibility can go a long way. SCC's high-speed Internet solutions are designed to serve all bandwidth needs, whether you're expecting a few dozen guests or a few thousand. We provide specific bandwidth solutions to support all needs, such as high-speed web browsing and live video streaming, over a secure and private network.

## BENEFITS

### Full Installation by SCC Technicians

SCC Technicians install and implement all necessary cabling, wire drops, and wireless access points catered to your specific bandwidth needs.

### Temporary WiFi Connectivity

Gain access to fast, reliable WiFi connectivity and the bandwidth to support every attendee's needs including web browsing, WiFi calling and live video streaming.

### Secure, Private Internet Access

SCC's encrypted network and advanced security protocols prevent any breaches, hacks or denial of service (DoS) attacks.

### Custom Splash Pages

Prompt your attendees to log in via a custom splash page that can be used to advertise offers, promote existing services or provide valuable information.

### 24/7/365 Support

SCC's expert technicians are always available to answer any questions and provide support.
